specialize in: b.s. Yes, you have to be good in math, yes, you have to be well educated, yes you have to have nerves of steel, you have to be willing to bet the farm, yes, you have to have an enormous sense of entitlement, and yes, you have to live in a bubble. Jonathan Fields, former hedge fund attorney is not like you or me (I ain't no hedge fund manager.) The average person doesn't have a ton of money in the bank to take them thru a career change in NY, or a contact list that can circle Manhattan (financial guys are notoriously out of shape, and they'd work out with someone who understands them than some stranger; it's intimidating.) and most people do not have the confidence or the financial means to quit their job, especially when they are married with kids. Most people are uncomfortable with the amount of risk it takes to be a successful entrepreneur. Most businesses fail within a year. Repeat: contacts are enormously important. At least in this universe. The average person also doesn't have the business or legal education, the negotiating skills, the manic energy, and the drive to do what Fields did. Not to mention the ability to handle enormous stress. The competitive spirit to dominate and win. I applaud Fields, but he is not average and while the advice in the book is good, it is good only for some people, a rare few. Buy it, read it, and if you are one of those special few, by all means go for it. But don't ever feel like a failure just because you can't achieve what he did. 0 of 0 people found the following review helpful. To Do What I Love By J.A. Faulkerson This book has given me the information I need to pursue my passions as an author and social entrepreneur. The author offers practical advice for developing a plan for starting second careers. We just need to be intelligent about it, and if married with children, garner the prayers and support of our loved ones. I learned there is nothing worse than having a passion for something and not doing what is necessary to pursue and actualize it. I'm more determined than ever to make my dreams come true. 1 of 1 people found the following review helpful. The Inspiration Needed To Dominate During Tough Economic Times. From Publishers Weekly For all the corporate drones who feel drained and devalued by their jobs and long to pursue their passions, Fields, a high-powered attorney turned successful entrepreneur, offers a motivational and practical guide to starting your own business. The author tells his own story of corporate disillusionment and physical deterioration (capped by a stress-exacerbated heart attack, which he interpreted as his body literally rejecting his career) to a new life as a fitness entrepreneur. Fields moves beyond self-help rhetoric to proffer helpful, no-nonsense steps for aspiring business owners, acknowledging that career renegades must not only identify their own secret passion but must also translate it into a profitable and sustainable enterprise. In addition to sharing inspirational career renegade cases studies, such as Liv's Story, in which a frustrated artist discovers a profitable niche decorating custom cakes, Fields provides pragmatic strategies for creating a realistic business plan, exploiting technology and employing affordable guerilla marketing. While the author does not spend much time addressing the financial risks, chances of failure or enormous commitment of personal energy and resources involved in entrepreneurship, he does provide an engaging firsthand look at the rewards in doing what you love for a living. From Booklist Renegade in the title is appropriate, especially if readers are searching for a traditional career guide, which this is not. Instead, former high-powered New York City lawyer turned serial entrepreneur Fields leans heavily on the 75 percent of employees who are dissatisfied with their jobs. The first part involves discovering one's secret passion, via a few exercises. What makes the journey with this author worthwhile are his sections on determining the exact work path (yes, via research on the Internet) and on developing a business. The references and ideas will inspire; he also interviews quite a few renewed careerists, whether it's the tale of the young mother who started the Young Rembrandts franchise or an artist who found her passion in creating edible art through her family-owned Rivera

Bakehouse. Part 3 zeroes in on honing online knowledge and creating an authority figure, via such social networks as MySpace or through blogging and word of mouth. --Barbara Jacobs "Career Renegade is a game changer...hell, it's a life changer!" -Karen Salmansohn, bestselling author of Be Happy, Dammit! and The Bounce Back Book "Through his own compelling story and piles of great advice, Jonathan Fields shows how you can pay the bills by pursuing your passion.
