Jing Bian : China's Securities Market: Towards Efficient Regulation (Routledge Economic Growth and Development Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised China's Securities Market: Towards Efficient Regulation (Routledge Economic Growth and Development Series):

This book provides an analysis of the development of the Chinese securities market, with special reference to the information disclosure regimes in Mainland China, the UK, and Hong Kong. It examines the listed companies, stock exchanges, securities companies, financial intermediaries, financial regulators and investor protection of the system in China, the UK and Hong Kong. The book looks at the role and functions of the securities regulatory commission, and highlights the details and insights that generally reveal the past and current status of the information disclosure regime in the Chinese securities market. By identifying problems and their reasons, the book forms an approach to further develop securities regulation.

About the AuthorJing Bian teaches in the Faculty of Law and Social Sciences at SOAS, University of London, UK.
