Tatiana Bachkirova : Coaching And Mentoring Supervision: Theory And Practice (Supervision in Context) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Coaching And Mentoring Supervision: Theory And Practice (Supervision in Context):

2 of 3 people found the following review helpful. Comprehensive support for supervisors By David Tinker Once I became used to the layout of the book I found it really useful to move between chapters to compare and contrast. As supervision becomes more relevant for all involved in coaching and mentoring it's good to see an acknowledgment of the range of approaches available although I must confess to having flicked through some of the more complex methods with less attention than the well illustrated practical models. I've just completed a Diploma in Supervision and

have found this book supportive reading and would highly recommend it.

A definitive text covering the latest thinking, models and approaches from expert practitioners in coaching and mentoring supervision.

About the Author Tatiana Bachkirova, is an academic, coach and coaching supervisor with a particular expertise in coaching psychology and coaching supervision.
