David Clutterbuck, Carol Whitaker, Michelle Lucas : Coaching Supervision: A Practical Guide for Supervisees before purchasing it in order to gauge whether or not it would be worth my time, and all praised Coaching Supervision: A Practical Guide for Supervisees:

Just like the coaching relationship, supervision is most successful when it is a collaborative endeavour, with both parties clear on their roles and the process. Coaching Supervision is an intensely practical book providing guidance on

when, why and how to seek supervision, and on how coaches can make the most of the supervision they receive. Written by experienced supervisors who have a deep understanding of the field, and drawing on research into good practice internationally, this book:

- Explains what supervision is and how it differs from other 'helping conversations';
- Provides a step by step approach to choosing a supervisor
- Advises on how to structure the coach/mentor development journey
- Explores a breadth of activities that enhance reflective practice
- Shows how supervision is an integral element of professional coaching and mentoring

This practical guide will be vital reading for all established and trainee coaches and mentors participating in the supervision process, either as supervisors or supervisees.

Clutterbuck and colleagues offer a highly practical guide full of case studies, examples, personal insights and tips. This guide is an excellent resource for those new to supervision, those looking for a supervisor, as well as the more experienced coach who wonders how they can get the most from their supervision sessions.
