Nigel Swain : Collective Farms which Work? (Cambridge Russian, Soviet and Post-Soviet Studies) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Collective Farms which

Work? (Cambridge Russian, Soviet and Post-Soviet Studies):

This book analyses Hungarian collectivization from a sociological perspective. Rather than consider Eastern European societies in the light of social stratification and social mobility surveys, it takes as its point of departure the commitment of Eastern European societies to industrialization within the constraints of a socialist economy and, by examining social change from the viewpoint of labour and those who control it, places the focus more strongly than has traditionally been the case on the production of social wealth, and the relations which circumscribe it, rather than on the ways in which wealth is distributed and consumed.
