Mathias Eggert : Compliance Management in Financial Industries: A Model-based Business Process and Reporting Perspective (SpringerBriefs in Information Systems) before purchasing it in order to gage whether or not it would be worth my time, and all praised Compliance Management in Financial Industries: A Model-based

Business Process and Reporting Perspective (SpringerBriefs in Information Systems):

Since the peak of the world financial crisis in 2008, compliance management has gained more and more interest from practice and research. In particular the financial service industry is strongly regulated and has to follow specific laws, standards and guidelines. Considering the steadily increasing number of legal requirements in the design of information systems is a challenge to financial service providers. This book investigates the challenges of compliance management in financial industries and provides solutions for a compliant design of information models. From a business process perspective, an approach is presented that enables the automatic checking of business process models. From a supervisory reporting perspective a modeling technique is presented that allows for modeling regulatory data warehouse requirements as well as its analysis. Besides these two perspectives the author provides insights into the perceived relationship of Information Systems and Law.

About the Author Mathias Eggert is researcher at ERCIS - European Research Center for Information Systems. He received a scholarship from Siemens Business Services, Germany and worked for Siemens in Germany and Taiwan. Konrad Adenauer Foundation funded his current research work. His research is focussed on business process management and data warehouse design. Furthermore he is interested in investigating the collaboration of IS and legal experts in regulatory-driven IT projects.
