From Routledge : Economics and Regulation in China (The Economics of Legal Relationships) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Economics and Regulation in China (The Economics of Legal Relationships):

This book, from a top international group of scholars, explores the ways in which economic tools can be used to improve the quality of regulation in general and legislative tools in particular. As the role of law becomes increasingly important in China, the question arises of how effective regulatory and legislative tools can be developed to accompany the Chinese evolution towards a welfare state. China therefore provides a unique case study for scholars and policymakers interested in examining how regulation can play a role in promoting sustainable development. Economics and Regulation in China goes beyond traditional economic analysis of law by focusing specifically on the question of how economic tools can guide the quality of legislation. To this end, the book centres in on three areas: regulation as a tool of economic growth, competition policy and environmental policy. Not only are these three domains of great importance for China, but they are also relevant for a broad scholarship interested in the economic

analysis of law. This volume contributes to discussions on how ex-ante evaluation of legislative proposals and ex-post analysis can increase the effectiveness and efficiency of regulation, using economic tools, offering insights that go beyond the particular case of China. The analysis offered by this book makes it an invaluable resource for academics and policymakers alike.

About the Author Michael Faure is Professor of Comparative and International Environmental Law at Maastricht University, the Netherlands. He is also Professor of Comparative Private Law and Economics at the Erasmus School of Law, the Netherlands. Guangdong Xu is Associate Professor of Law and Economics at the China University of Political Science and Law, China.
