**Martha Shirk, Anna S. Wadia : Kitchen Table Entrepreneurs: How Eleven Women Escaped Poverty And Became Their Own Bosses** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Kitchen Table Entrepreneurs: How Eleven Women Escaped Poverty And Became Their Own Bosses:

0 of 0 people found the following review helpful. Inspiring Entrepreneurship Stories By Stella Carrier Kitchen Table Entrepreneurs: How Eleven Women Escaped Poverty And Became Their Own Bosses by Martha Shirk and Anna S. Wadia (with a foreword by Senator John Kerry) features women who have overcome adversity to successfully open

their own businesses. Sharon and Michelle Garza, Jeanette Bradshaw, Lucille Barnett Washington, Sheela Drummer, Roselyn Spotted Eagle, America Ducasse, Jacky Clark, Yasmina Cadiz, Ollie Barkley, and Danielle Franklin are among the women mentioned in *Kitchen Table Entrepreneurs*. 5 of 6 people found the following review helpful.

InspirationalBy ExiledinParadiseThis book really brings to life the struggles that women entrepreneurs face as they try to turn an idea for a business into a profitable reality. The real-life women whom the authors profile are truly memorable, from Roselyn Spotted Eagle, the Sioux beadworker and quilter who has had an unimaginably hard life, yet doesn't complain, to Yasmina Cadiz, the stylish, edgy creative type in Chicago who you just know will end up being famous some day. The book reads like a novel, even though it contains lots of useful advice about how to get a small business off the ground. I recommend it highly to any woman who dreams of being her own boss one day. 5 of 5 people found the following review helpful.

Encouraging stories for entrepreneursBy Lisa PeetSo whaddya know, turns out I'm a sucker for inspirational literature after all. This book was sent to me by a friend who's been following my dreams of starting my own business, and I have to say it was extremely encouraging - both the act of his sending it to me and the stories contained herein. Even if you're not coming from a place of poverty or disenfranchisement, each one of these stories has a good nugget of truth in it: the obvious value of hard work and believing in oneself, but also seeing what people go through in the process of applying for a loan with tenuous collateral, or looking to expand an existing business, or taking a second job to secure health coverage. There's something good in each of these stories, and - yep - they're heartwarming. It's a nice collection.

Over the last five years, the number of women-owned businesses has grown at twice the rate of all U.S. firms; in the next few years, the number is expected to surpass the six million mark. *Kitchen Table Entrepreneurs* tells the inspirational stories of eleven low-income women who have marshaled the creative energy, confidence, and capital necessary to start their own small businesses. These women, who have used their entrepreneurial skills as a route out of poverty, give an American face to an economic empowerment tool that has enjoyed great success in developing countries. By becoming their own bosses, they not only provide for their children but also inspire them. Though each of their businesses is unique, all eleven of these women have discovered previously unknown strengths as they've struggled to overcome personal and bureaucratic obstacles. All received important assistance from nonprofit organizations supported by the Ms. Foundation for Women, the pioneer funding entity of microenterprise programs in the United States. Updated with a new epilogue.

From Publishers WeeklyIn *Kitchen Table Entrepreneurs: How Eleven Women Escaped Poverty and Became Their Own Bosses*, journalist Martha Shirk and Ms. Foundation program director Anna S. Wadia celebrate women who went from low-income employees to small business owners. Their stories are inspiring: America Ducasse immigrated from the Dominican Republic and eventually launched a home-based day-care business in Massachusetts, while Lucille Barnett Washington started working as a clerk at an auto parts store in Detroit in 1961 and today runs an auto parts and repair business. Each of the women received assistance from nonprofit organizations supported by the Ms. Foundation for Women. Photos.Copyright 2002 Cahners Business Information, Inc.From Library JournalIn the United States, the number of women-owned companies is growing at twice the rate of all firms and will reach six million this year. This trend is exemplified by the 11 entrepreneurial or micro-enterprise case studies covered here. These female entrepreneurs worked their way out of poverty, often balancing the obligations of single parenthood and work and taking risks to achieve the dream of success for themselves. Their enterprises encompass many different industries, including retail, restaurant, and small manufacturing, and are located throughout the United States. These women were assisted by various nonprofit organizations, like the Ms. Foundation for Women, that support economic development through micro-enterprises. Documentary black-and-white photographs capture the hard work and spirit of the women and their families, and two appendixes provide additional data on micro-enterprise research and resources available to help new businesses. These studies by journalist Shirk and Wadia, a program director at the Ms. Foundation, should be included in business and women's studies collections in academic and public libraries.Susan C. Awe, Univ. of New Mexico Lib., AlbuquerqueCopyright 2002 Reed Business Information, Inc.From BooklistSince 1985, the Ms. Foundation for Women has supported local organizations nationwide that train, counsel, and provide financial assistance to microenterprises, small businesses usually owned and operated by one person that employ five or fewer workers and require less than \$25,000 in start-up capital. This book tells the stories of 11 women microentrepreneurs who overcame numerous obstacles to start small businesses that provide financial security for themselves and their families. A woman and her teenage daughter with food-service experience succeed with their own hotdog cart, which provides major support for their family, while an American Indian woman in her 60s parlays her beadwork, quilt making, and cooking skills into a business that ensures her family's comfort. An unemployed 30-year-old with a \$15,000 loan succeeds with an Internet business. This book offers excellent insight into the organizational structures that make these successes possible and provides inspiration especially for low-income women who dream of forming their own businesses.
