Andrew Weeks, Katie Lightly, Sam Ononge : Let's Do Audit!: A Practical Guide to Improving the Quality of Medical Care through Criterion-Based Audit before purchasing it in order to gauge whether or not it would be worth my time, and all praised Let's Do Audit!: A Practical Guide to Improving the Quality of Medical Care through

Criterion-Based Audit:

This book is aimed at everyone who wants to improve the quality of the medical care they provide: nurses, doctors, managers, healthcare assistants, students, laboratory clinicians and so on. The book demonstrates how to examine the quality of the care you provide using simple steps: decide what you should be doing in any circumstance, examine whether or not you are doing it and then look for ways of improving your care until you are doing it correctly. The book contains six lessons, each designed to take around one hour, with exercises to complete. The lessons can be used by individuals or in a group setting. The book will be of interest to anyone working in healthcare practice who is keen to find a better way of working.

'This book demonstrates extraordinary clarity on audit and has been reinforced with easy to follow steps and diagrams ... a MUST for all who want audit but don't know where to start.' *Journal of Obstetrics and Gynaecology*

About the Author Andrew Weeks is a Consultant (Clinical Senior Lecturer) at Liverpool Women's Hospital and a Professor at the University of Liverpool. He is currently a member of the Joint RCOG/WellBeing Research Advisory Committee. Katie Lightly is an ST1 at Southmead Hospital, Bristol. Sam Ononge is currently a Lecturer in the Department of Obstetrics and Gynaecology of Makerere University College of Health Sciences. He is also a trained clinical epidemiologist and biostatistician.
