R. Barwell : Macroprudential Policy: Taming the wild gyrations of credit flows, debt stocks and asset prices before purchasing it in order to gauge whether or not it would be worth my time, and all praised Macroprudential Policy: Taming the wild gyrations of credit flows, debt stocks and asset prices:

The financial crisis of 2008 is probably the single most important economic event in post-war history. Macroprudential policy is the response to that crisis ndash; a determined attempt to stabilize the financial system. This book explains why it is necessary, who will be responsible for executing this responsibility and how they will go about doing it.

To come
