Christopher Bovis : Public-Private Partnerships in the European Union (Routledge Critical Studies in Public Management) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Public-Private Partnerships in the European Union (Routledge Critical Studies in Public Management):

Public procurement in the European Union represents almost twelve per cent of the EU's GDP and is continuing to increase, having been identified as a key objective in the EU's aim to become the most competitive economy in the world by 2010. This book provides a one-stop shop, multi-disciplinary approach to public procurement and will be of use to academics and policy-makers. Providing its readers with practical description and analysis of the relevant policies, law and jurisprudence, the book also explores possible future trends in public procurement regulation.
