Kevin D. Freeman : Secret Weapon: How Economic Terrorism Brought Down the U.S. Stock Market and Why It can Happen Again before purchasing it in order to gauge whether or not it would be worth my time, and all praised Secret Weapon: How Economic Terrorism Brought Down the U.S. Stock Market and Why It can Happen Again:

1 of 1 people found the following review helpful. Insomnia causer!By Thomas M. MageeThis book is excellent! I hope everyone reads it. This book offers new knowledge that will scare everyone to death! I think this is a book that will cause people to lose sleep. It casts "National Security" issues in a new light. Every defense professional should

read this. It will cause you to look at threats totally differently. The book is about the 2008 financial crisis. It has been the topic of numerous books, documentaries, and now movies. Brad Pitt and others made a movie about it called *The Big Shorts*. The author's argument is very different than the rest of the books about the crash. This author lays out a pretty convincing argument that foreign powers used the tools of today's market to cause its downfall. The book is very well documented. These tools seem very complex. I had to reread pages to understand what he was talking about. The pages read almost like a legal brief. However everything he says minus the responsible powers is the same points others have made. Selling short, credit default swaps, lack of regulation of hedge funds, the housing crisis and other things caused the market to crash. Brad Pitt's movie mentioned the same things he talked about in this book. The difference is not the other party but terrorists. He even zeros in where the money came from. It was funneled in through two specific firms. Where they got the money he doesn't specify. The author points to either the Arabs, China, Russia, or both. He lays out a pretty sound argument that crash was just a step in the road to our collapse. The next thing is an attempt to push the world economy away from the dollar and the stopping of purchasing of US debt. Both things would bring disaster to us. It would bring about high unemployment, high inflation, stoppage of various welfare programs, and skyrocketing interest rates like in the 70s. The scary part of the book is the chapter in how he tries to convince people on what is going on. No one seemed to care what is going on, until the next economic crash. What makes it worse is that it could happen overnight, just like it did in 2008.

The Most Important Subject is Economics By Orchid With all the chaos and scary news out there, in my opinion it is the most important - yet financial terrorism is being totally ignored by the media, government, and the public. For instance, It took our nation 10 years to build the 12.8 Trillion dollars that vanished from the U.S. in one day in 2008. It is also said that 1/2 the world's wealth vanished that day. The culprit was determined to be bear attacks via the dark pools (meaning anonymous trades) using credit default swaps, derivatives, and naked short selling. How did the U.S. respond to this? Denial because everyone plays by the rules or at least has a rational market decision. Can the U.S. weather another financial attack and where would it come from? Possibly, if we didn't have the massive 17T national debt. We have some powerful enemies like Russia, China, and the Jihadists who would love nothing better than to annihilate the U.S. The move to form the BRIC financial alliance to usurp the U.S. dollar as the global reserve currency with China, India, and Russia is a form of economic war that will make the U.S. dollar irrelevant. I didn't realize that there was Sharia compliance banking or that it was so large. The book explains that redistribution of any economic gains depends on who the money was taken from and how it was taken. If the money is taken from non-muslims by force, the soldier keeps 4/5 of it and 1/5 goes to jihad, the poor, or scholars and judges. If the money is not forcefully taken (like taxes on non-muslims) then it all goes to the treasury. But if it is taken from non-muslims via theft or embezzlement, then the thief keeps all of it. So not only is there a whopping incentive to steal from the U.S., it is actively encouraged in their magazines. Even Bin Laden was much more interested in financial terrorism because no body got killed, it was much cheaper to wage an economic war, and they could cover their tracks so nobody could trace who took the money. Ironically, a lot of the big banks like Citigroup, Mastercard, and Visa, have established Sharia compliant divisions where the U.S. money legally goes back into supporting economic terrorism. One of the big problems in 2008 was the malfeasance of the big banks. So they create the problem, get bailed out with U.S. tax payer money, which in turn goes to a bank like AIG that the books points out is substantially owned by Muslims. So it causes the problem, solves the problem, and continues to fund economic Jihad all at taxpayer expense. Sun Tzu would be proud to those who use U.S. money to destroy the U.S. economy while increasing their own global power with such silence and deception. As bad as this may be, it is not to minimize China which is perhaps much more of a threat. We really need to demand economic accountability, rein in the deficit spending, and get rid of wall street practices that make us vulnerable as a nation.

The Saudis have openly declared War on any country that does not have Sharia Law in its constitution, including the United States. This book names names, shows actual banks, shows actual markets, and shows documented financial bear attacks to overthrow America. The Saudi Dictatorship invented the "SHARIA COMPLIANT FINANCE LAWS." Sharia Law is the enemy of every Muslim, every Christian, every Jew, every American, and every free citizen in the world. "Sharia Compliant Finance" and "Sharia Law" were written by the Saudi Dictators, for the Saudi Dictators, to spread their bloody, genocidal, Saudi dictatorships around the world. Sharia Law was written centuries after the Koran, and is still being written today by the Saudis. Therefore Sharia Law is not part of the Islamic Religion, or of any Religion, for that matter. It is law for a ruthless, genocidal, dictatorship to legally murder any citizen, along with murdering any free citizen of any other country. Thus Flying Jets into the World Trade Center, or bombing innocent civilians by the hundreds, is legal under Sharia Compliant Finance and the Saudi Sharia Law. Sharia Law is not a religion. Sharia Law and Compliant Finance was written by dictators, for dictators, and against all free citizens in the world. Sharia Law was written to kill all citizens' freedoms, and to create a ONE WORLD DICTATORSHIP, under Saudi rule. No one wants to be ruled by the bloodiest regime since Hitler. Every American needs to read this book. Today the Saudis own enough American politicians, called "Puppets", to BANKRUPT AMERICA through FINANCIAL WARFARE and the SHARIA COMPLIANT FINANCE LAWS. This book demonstrates the principles and techniques, which the puppet politicians use to bankrupt America.

For example, to bankrupt America, Puppet Politicians have overthrown Egypt, Libya, Syria, Iraq, Afghanistan, Tunisia and Yemen by sacrificing thousands of American Lives and \$Trillions of American Dollars. Puppet American Politicians leave Sharia Law in each of these country's constitutions. Thus, these countries are not DEMOCRACIES; these countries are all under Saudi dictatorships. Soon the Saudis will sacrifice more American lives, and blood, to overthrow Iran and Syria. READ THIS BOOK. This is a Saudi War for World Conquest and America is the greatest loser. This is a Saudi War to bankrupt America and sacrifice American lives to create more Saudi Dictatorships. WAKE UP AMERICA. READ THIS BOOK. UNDERSTAND THE SAUDI'S WAR ON AMERICA IS REAL. UNDERSTAND THE WAR, BEFORE IT'S TOO LATE.

Who's really to blame for America's catastrophic financial meltdown and devastating national recession? Contrary to what the "Occupy Movement" might tell you, it's not just greedy Wall Street executives (though they certainly earned their share of scorn). It's not just failed regulation (even though Washington has failed miserably, both Republicans and Democrats, to protect us). As one of America's top financial professionals reveals in this shocking new book, the failures of Wall Street and Washington have opened us up to economic warfare, with our foreign enemies exploiting our lurking financial weaknesses. In *Secret Weapon*, Kevin D. Freeman unveils how all the evidence—including motive, means, and opportunity—points to America's foreign enemies as deliberately pushing our economy over the brink. In this stunning expose, Freeman reveals: The evidence linking Communist China and Islamic finance to economic warfare against the United States. Why initial reports linked the 2008 stock market crash to economic terrorism—and why the Obama administration continues to look the other way. How the financial attack unfolded—and how the perpetrators tried to cover their tracks. Why you should expect another financial attack even more devastating than the last one—and how you can protect yourself from it. In *Secret Weapon* you'll learn what our enemies know and what the Obama administration has chosen to ignore—that our financial system is profoundly vulnerable to financial terrorism, and that we are being targeted for further and even more destructive attacks by our enemies, who want to cripple America as the world's leading economy. If you want to protect yourself and protect our country, then you need to read *Secret Weapon* to understand how we have entered a new age of warfare—an age our enemies want to make the Dark Ages of the United States.
